Established in 2004 and located in Montpellier, France, IDvet develops, manufactures and sells diagnostic reagents for the detection of infectious diseases in farm animals.

Complete range for poultry

IDvet offers an extensive range of diagnostic kits for the evaluation of antibody levels against major poultry diseases. The ELISA kits, together with the IDSoft™ data analysis program, allow veterinarians and laboratories to detect infections, monitor vaccine and maternal antibody titers and improve vaccination protocols.

Many PCR kits are currently under development in order to offer a comprehensive line of poultry diagnostic tools.

Scientific know-how

Thanks to close relationships with leading scientists worldwide, IDvet strives to be at the cutting edge of veterinary diagnostics. For example, IDvet has collaborated with vaccine manufacturers to develop new ELISAs for use with recombinant vector vaccines.
